Tawteen/ICV

Our Story

Inspired by Qatar Vision 2030 , the fully integrated factory for screws, nails and bolts was established to meet the needs of the country and the Middle East. Under the full supervision of Qatar Energy’s Tawteen Program the facility was expanded to include all stages of production, ensuring alignment with national priorities and sustainable development goals.

About Us

Hard Screw for Bolts and Screw has been Founded in 2018 is Qatar's first fully integrated fastener manufacturing factory, specializing in producing a wide range of high-quality fasteners, including bolts, screws and nails. We pride ourselves on delivering products that meet the highest standards of quality and durability, catering to the diverse needs of various industries.

DUSSUR
دُسُّر

OUR BRAND

As a manufacturer and pioneer in the Qatari market our factory is dedicated to support the local economy while also striving for excellence in both production and customer service. With a commitment to innovation and continuous improvement, we aim to expand our reach and establish a strong presence in both local and international markets.

Corporate Philosophy

VISION

- To be region leading fasteners provider.
- Customer satisfaction is our first gain to ensure continuity and success.

MISSION

- Delivering the highest quality in all our products.
- Maximizing in-country value to boost local development and economic development.
- Ensure outstanding customer service and satisfaction at every interaction.
- Committed to operating with the utmost standards of safety, health, and environmental protection.
- Fostering a culture of continuous improvement to drive excellence across all operations.

CORE VALUE

- Collaboration and mutual support within our team.
- Fairness and equality in all our actions.
- Integrity and honesty as the foundation of our work.
- Transparency and simplicity (The straight line is the shorter one).

Bolts

Hex Bolt Black Oxide Coated

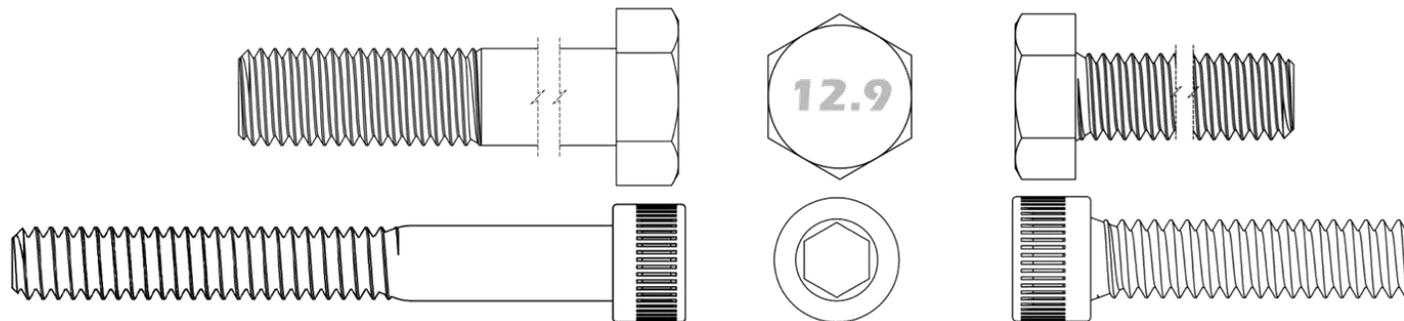

Durable hex bolts with a black oxide coating for added corrosion resistance. Ideal for industrial and construction application.
Available in various sizes.

Hex Bolt Zinc Electro Plated

Durable hex bolts with a galvanized coating for superior corrosion resistance. Perfect for outdoor and heavy duty applications where protection against rust and weathering is essential.
Available in various sizes.

Allen Key Bolt Black Oxide Coated

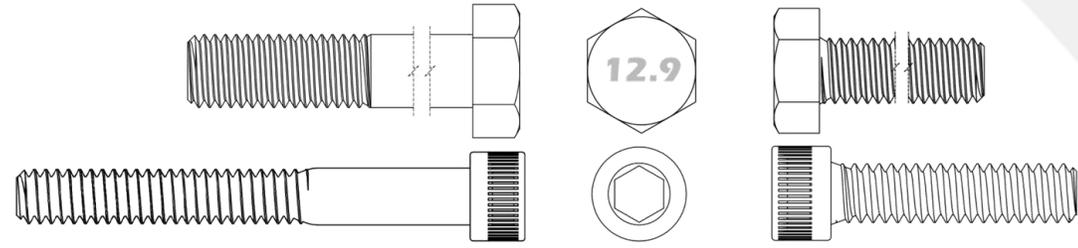

Strong and reliable Allen key bolts with black oxide coating for improved corrosion resistance. Ideal for precision applications in automotive, machinery and construction.
Available in various sizes.

OUR PRODUCTS

Hex Head Bolt Allen Key Head Bolt

Fully & Partially Threaded

BOLTS

Type	Hex Bolts / Socket Head Bolts / Carriage Bolt
Coating	Black Oxide, Zinc Electro Galvanized, Hot Dip Galvanized, PTFE
Grade	4.8 / 8.8 / 10.9 / 12.9 / 931 / 933 / A 307 / A325 / A325M
Standard	ISO, DIN , ASTM ,
Dia Range	M6 To M18 ' can go up to M100

Steel Nuts

Steel nuts are essential fasteners used in conjunction with bolts or screws to hold various components together securely in mechanical applications. They are typically made from carbon steel, stainless steel, or alloy steel and come in different types (such as hex nuts, lock nuts, and flange nuts) to suit various purposes. Steel nuts are known for their strength, corrosion resistance (depending on the type of steel), and durability. They are widely used in industries such as construction, automotive, manufacturing, and heavy machinery.

NUTS

Type Hex Nut / Heavy Hex Nut / Square / Cap / Wing / Coupling

Coating Zinc Electro Plating, Hot Dip Galvanized

Grade 934 / Gr 7 / Gr 8 / A563 G A / A 194 2H

Standard DIN, ASTM in Metric and Inches

Dia Range All Sizes in Metric & Inches

Anchor Bolt GI-HDG

I-Anchor Bolts

I-Shaped Anchor Bolts from hard screw are designed for heavy-duty structural support and foundation applications. Made from high-strength, corrosion-resistant materials, they provide durability and reliability. Ideal for securing steel structures, machinery, and equipment, they comply with international quality standards to ensure maximum performance and stability.

L-Anchor Bolts

L-Shaped Anchor Bolts from Hard Screw are designed for structural support and foundations. Made from high-quality, corrosion-resistant materials, they ensure durability and reliability. Suitable for securing steel columns, machinery, and light poles, they meet international standards for strength and performance.

J-Anchor Bolts

J-shaped anchor bolt from hard screw is a fastener with a “J” curve, designed to anchor structures securely to materials like concrete. The curved end embeds into the material, providing strong holding power. It’s commonly used in construction and machinery.

U-Anchor Bolts

U-shaped anchor bolt from hard screw has a “U” curve, designed to be embedded into a material like concrete, with both ends providing a secure grip. It’s used to anchor structures or equipment, offering stability and resistance to pull-out forces.

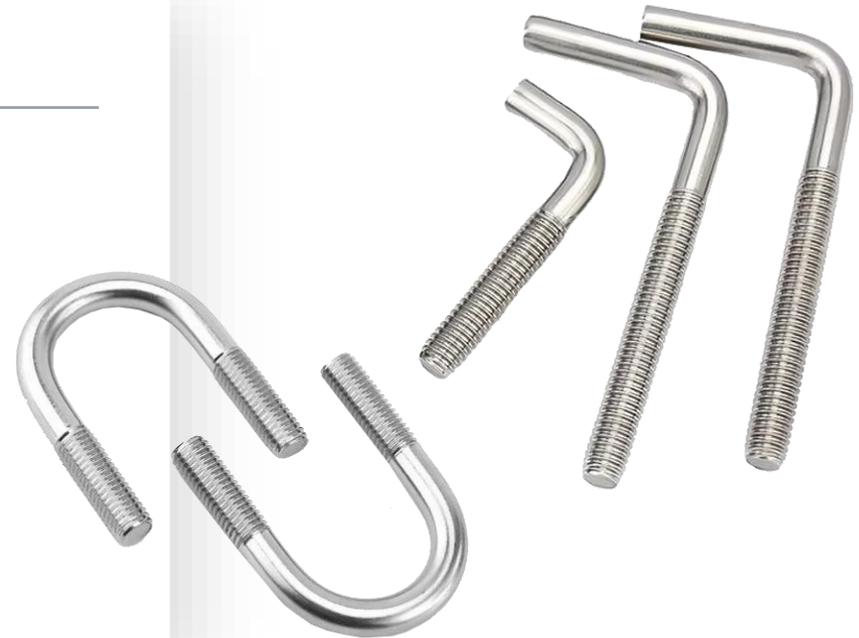

Anchor Bolt

Anchor bolts made from different grades of steels are essential fasteners used to secure structures to concrete foundations. provides stability and support for various applications, from building frames to heavy machinery installations. bolts are made from high-strength steel, which offers durability and resistance to bending and breaking.

We specialize in a wide range of anchor bolts, including expansion bolts, concrete anchors, and custom solutions tailored to meet the specific needs. we are committed to quality and precision. Our skilled team of engineers and technicians meticulously oversee the entire manufacturing process, from sourcing premium raw materials to the final quality checks. anchor bolts are coated with zinc to protect against corrosion, making them suitable for outdoor applications where exposure to moisture is a concern. black oxide finish will enhance corrosion resistance or for aesthetic purposes.

ANCHOR BOLTS

Type	Straight Anchor / L Anchor / J Anchor / U Anchor / Square U
Coating	Zinc Electro Plating, Hot Dip Galvanized
Grade	4.8 / 8.8 / 10.9 / 12.9 / A36 / A193-B7 / 529 / 1853 Type1 , Type2 , Type3
Standard	ASTM, SAE , ISO
Dia Range	M6 TO M30 ' Can go up to M100 '

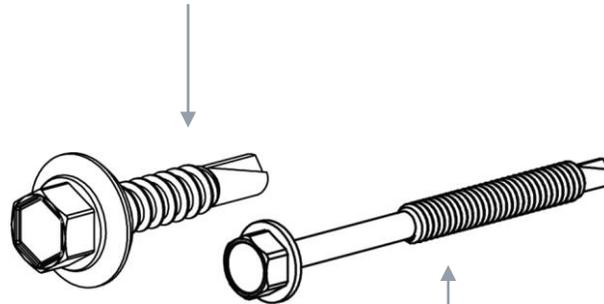

Screws

Self Drilling Screw

Screw with a built-in drill tip that eliminates the need for pre drilling. Ideal for metal to metal applications.

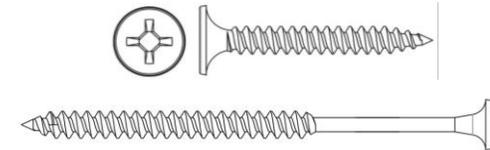

Self-Drilling Screw with EPDM Washer

Self-Drilling Screw

Dry Wall Screw

Drywall screws, also known as gypsum screws or plasterboard screws, are specifically designed for securing drywall panels to metal or wooden frameworks. These screws feature a countersunk head and sharp thread, ensuring strong fixation without damaging the panels. They are typically made of corrosion-resistant steel, offering durability and a long service life.

Screws

Machine Screws

Machine Screws are threaded fasteners typically used with a tapped hole or paired with nut . Designed for precision application offering strong and secure fastening for machinery applications and electronics. These screws come in variety of head style , materials and finished to suit diverse industries needs.

Chipboard Screw

Chipboard screws are specially designed for securing chipboard panels and similar wood-based materials. They feature a countersunk head and sharp, closely spaced threads, enabling easy penetration and strong fixation in wood. These screws are widely used in furniture manufacturing and construction. They are made from high-quality steel, often coated with a rust-resistant layer to ensure a long service life.

SCREWS

Type	Self Drilling Screw / Dry Wall Screw / Machine Screw / Wood Screw / Self Tapping Screw / Chipboard Screw
Coating	Zinc Electro Plating, Zinc Manganese Phosphate, Black
Grade	84, 85, 912, 963, 965, 7981, 7982, 7983, 7504, 7991
Standard	DIN
Dia Range	All Available sizes

Stud Bolt

A stud bolt is a type of fastener used primarily in flanged connections, such as those found in pipelines, pressure vessels, and heavy machinery. It consists of a threaded rod (the stud) with threads on both ends and often includes two nuts for securing the connection.

Stud bolts are made from high-strength materials like carbon steel or alloy steel, depending on the application and environmental conditions.

STUD BOLT

Type	DIN2510 , ISO 898-1
Coating	Zinc Electro Plating , Hot Dip Galvanized , PTFE
Grade	4.8,8.8,10.9,12.9,14.9,DIN976,A 307G A-B , A193B7
Standard	DIN,ASTM,ISO
Dia Range	M06 TO M30 ‘ Can go up to M100 ‘

Nails

Nails are one of the most common and versatile fasteners used in construction, woodworking, and a variety of other applications. Iron nails, particularly when alloyed with carbon come in different types and are designed for specific tasks based on their size, shape, and any surface treatment or coating they have. Our factory can produce high-quality nails made from premium carbon steel and other materials.

Equipped with latest machinery, we manufacture a wide range of nail types, including common nails and concrete nails to meet the diverse needs of the construction and woodworking industries. We adhere to strict quality control standards, ensuring that each nail meets rigorous specifications for strength, durability, and performance.

NAILS

Type Wood Nail / Concrete Nail
All Sizes

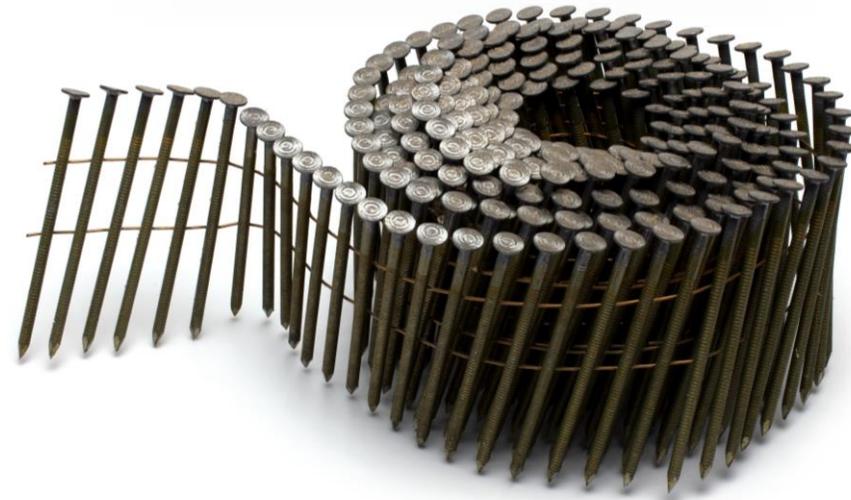

Coil Nails

Coil nails made from carbon steel are a type of nail arranged in a coiled shape and used in conjunction with pneumatic nail guns. Coil nails are commonly used in applications where large numbers of nails need to be driven quickly and efficiently.

- **Roofing:** Coil nails are often used for securing shingles and roof sheathing due to their corrosion resistance and speed of application.
- **Siding and Fencing:** Coil nails with galvanized coatings are ideal for exterior siding, fence panels, and other outdoor projects where weather resistance is crucial.
- **Framing:** Although framing typically uses larger individual nails, coil nails can be used in framing applications where speed and efficiency are needed.
- **Pallet and Crate Assembly:** Coil nails are widely used in industrial settings for assembling wooden pallets, crates, and packaging materials due to the speed and efficiency of pneumatic Nailers.

COIL NAILS

Sizes 1.5" / 2" / 2.5" / 3"

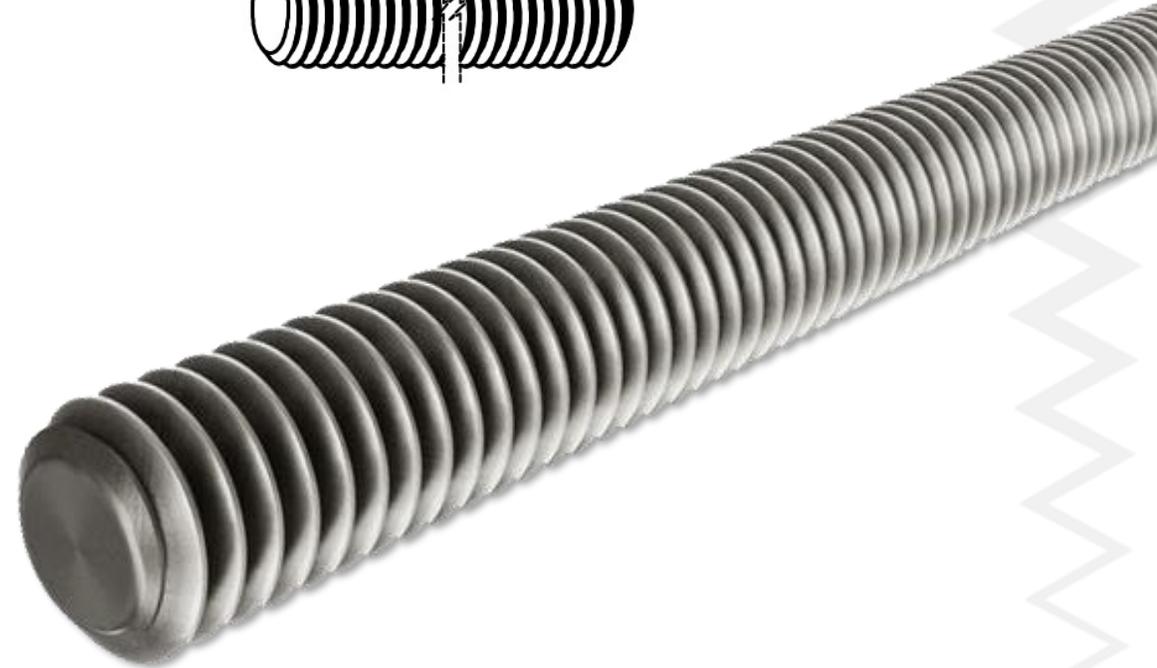

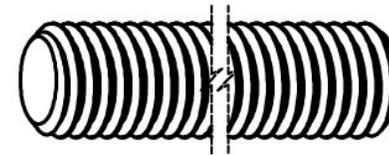

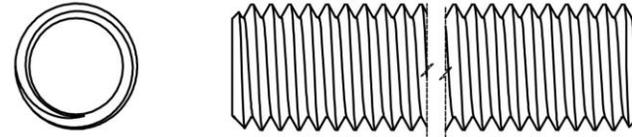

Threaded Rod GI-HDG

Fully Threaded

THREADED RODS

Type	Mild, High Tensile Steel
Coating	Zinc Electro plating, Hot Dip Galvanized
Grade	DIN976 / A193B7 / 4.8 / 8.8 / 10.9 / 12.9
Standard	DIN, ASTM, ISO In Metric
Dia Range	M6 To M64 In Metric

Why Hard Screw

Guaranteed Quality

We are committed to delivering high-quality products that meet global standards, ensuring reliable performance and durability.

Local Presence

As part of Qatar's localization program, we are strategically positioned near our clients, ensuring smooth communication and immediate supply.

No Minimum Quantity

We provide complete flexibility in order sizes, allowing you to purchase only what you need without committing to bulk orders

LC Not Required

Simplify your transactions with us—there's no need for costly letters of credit, reducing your financial risks and expenses

No Storage Space Required

With on-demand purchasing and small quantity options, you can minimize storage costs and financial risks related to surplus inventory

Why Hard Screw

On Time Delivery

We ensure timely delivery of our products, enabling our clients to complete their projects without delays

Reduce Operation Cost

Local manufacturer will save your direct costs such as transportation and inventory . also contributes to operational efficiency, risk reduction, and quality improvements. can be seen operational cost reduction in range of 10% -30%.

MADE TO ORDER

Customized production

We are ready to meet your specific needs by manufacturing tailor-made products designed to align with your project requirements.

Technical Support

Our expert team provides professional advice to help you choose the best products for your projects, reducing waste and enhancing efficiency.

Why Hard Screw

After Sales Support

WE offer continuous support after purchase to ensure customer satisfaction and resolve any challenges you may encounter.

Eco Friendly Products

We manufacture environmentally friendly products, helping our clients meet sustainability goals and reduce environmental impact

Support Local Economy

By choosing Hard Screw, you support local industries and contribute to strengthening Qatar's economy while reducing reliance on imports
